

Pencil and Paper Assignment for Lesson 4

1. What is printed to the console when the `main` method is run? Explain why this happens.

```
public class BadInherit extends SuperClass {

    BadInherit(){
        System.out.println("In BadInherit");
    }
    public static void main(String[] args){
        new BadInherit();
    }
}

class SuperClass {
    SuperClass(){
        System.out.println("In SuperClass");
        new BadInherit();
    }
}
```
